

Wafer Single Box

300mm & 200mm

APPLICATION

This single wafer package can be used to secure test & production wafers during transport throughout the clean room. This box is very economic and low cost.

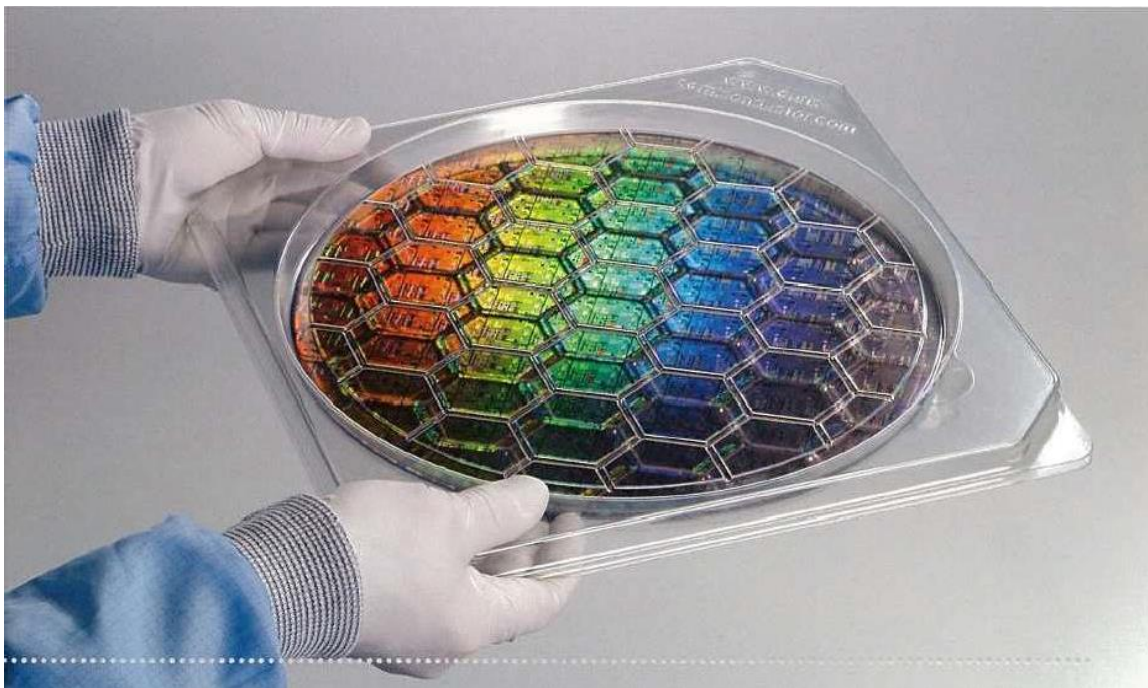

PRODUCT DESCRIPTION

The front side of the wafer does not make contact with the box even stacked.
 The contact takes place on the front side in the 3mm edge exclusion zone and the backside of the wafer.
 These boxes can be stacked open or closed with or without wafers.
 Two latches (one on each side) allow an easy opening of the box.
 With a special access the wafer can be easily removed with vacuum tweezers.

GENERAL SPECIFICATIONS

	300 mm	200 mm
Size:	330 x 330 x 20mm	250 x 250 x 20mm
Contact area	3mm Edge	3mm Edge
Weight:	300g	175g

Material used is high quality clear APET, 1mm thick.
 Transparent material for easy wafer viewing. Material with ESD properties.
